

Informed Consent and Cognitive Tests with Older Adults through Live Video and Prerecorded Video Interviewing

Hanyu Sun (Westat) and Ting Yan (NORC at the University of Chicago)

Research Questions

- How well older adults understand the content of typical consent forms?
- How feasible is it to deliver informed consent through live and prerecorded video interviewing for older adults?
- How to use live video interviewing and prerecorded video instruction to administer cognitive assessment tests for older adults?

Study Design

N = 60 healthy participants aged 60 and above

Outcomes

- Answers to probing questions
- Answers to debriefing questions
- Performance of cognitive assessment test
- Paradata (e.g., timestamps and mouse movements)
- Nonverbal behaviors (e.g., disfluencies and pauses)

Thank you!

Hanyu Sun (hanyusun@westat.com)
